

Water saving tips for guests

Why save water?

Here in Queensland, we're passionate about the environment, especially water conservation and sustainability.

The state's water supplies are under increasing pressure due to environmental factors and population growth.

By conserving water during your stay, you can help ensure our future water supplies.

How can you help?

Have a look at how many litres you can save each and every day through these simple actions:

Litres saved each day

Rinse your razor in a half-filled sink.

10

Reuse towels and linen—many hotels offer this as an option.

15

Report a slowly dripping tap to staff.

19

Turn the tap off when brushing your teeth. Use a cup to rinse.

20

Take a shorter shower.

26

It really does make a difference

It's amazing how much water we can save just by making a few minor changes. Over time, small efforts give big results.

Accommodation providers are playing a major part in water sustainability. By installing water-efficient devices, large premises can save more than 15 million litres each year.

Management may have installed devices like these in your room to help you save water.

Device	Potential water savings
Flow-controlled taps	40%
3-star showerheads	40%
Dual-flush toilet	65%

Take the message home

Remember, the water-saving tips you've read in this information sheet can be used in any household.

If you want to continue to conserve water after your holiday is over, why not try these ideas back at home.
