[Foreshore Taskforce-Map7](#)

Sub-precinct	Key objective	Foreshore Management Unit and objective as per Foreshore Management Plan	Coastal Protection	Vegetation/Embellishments	Recommendation
<p>Sub-precinct 13</p>	<p>To formalise pedestrian access to the beach adjacent to the boat ramp. Improve the visual aesthetics and functionality as an active recreational area. Improve and maintain safety and visual surveillance.</p>	<p>Management Unit: Developed parklands Objective: - Dominant native canopy and shrub vegetation. - Introduced landscape species may be appropriate. - Grassed areas are appropriate. - Revegetation of disturbed areas. - Vegetation planting and management designed to facilitate views through or over vegetation where there will be demonstrable public benefits. Management Unit: Natural dune and foreshore. Objective: - To protect and regenerate natural vegetation communities. - Active and on-going weed and fire management. Ecological restoration if necessary.</p>	<p>Approved Sandpush area - medium to high priority for active intervention.</p>	<p>Native and exotic species. Boat ramp, signage and car park.</p>	<p>2012/13 Capital program provision of a formal pedestrian access and embellished passive recreational area.</p>
<p>Sub-precinct 14</p>	<p>To maintain the existing fenced area as a natural area. Improved presentation and functionality of the area between the fence and the Esplanade. Improve and maintain safety and visual surveillance.</p>	<p>Management Unit: Developed parklands Objective: - Dominant native canopy and shrub vegetation. - Introduced landscape species may be appropriate. - Grassed areas are appropriate. - Revegetation of disturbed areas. - Vegetation planting and management designed to facilitate views through or over vegetation where there will be demonstrable public benefits. Management Unit: Natural dune and foreshore. Objective: - To protect and regenerate natural vegetation communities. - Active and on-going weed and fire management. - Ecological restoration if necessary. Management Unit: Nature Based Recreation Objective: - Retention of an essentially 'natural' setting. - Active and on-going weed and fire management. - Landscaping with endemic native species. - Removal of vegetation where necessary for public safety or picnic facilities/walking tracks.</p>	<p>Approved Sandpush area - medium to high priority for active intervention.</p>	<p>Area behind fence mapped and recognised as being of high ecological significance. Beach accesses.</p>	<p>Retain existing HES areas. Crown lift trees and trim vegetation around lighting and pathways to improve community safety and passive surveillance. Widen beach access entrances where appropriate. Prepare a design and costing's for a retaining structure and pathway from back kerb from Denman Camp Rd to the Riviera Resort to improve aesthetics and pedestrian functionality. Planting of low growing native shrubs along fencing where appropriate. General tidy up and weed control.</p>
