

## Being waterwise in the workplace

### Did you know?

Every day, the equivalent of 62 million buckets of water is used in Queensland workplaces.

A slow-dripping tap can waste enough water to fill more than 37 wheelie bins each year.

Less than one per cent of the drinking water produced is actually consumed by people. Most is used for showering, toilet flushing, laundry or outdoors.

Using an outdoor water sprinkler for just 30 minutes can use more than 600 litres of water.

It takes one litre of water to produce three sheets of A4 paper.
