

FACT SHEET

July 2021

Replacement of Existing Geotextile Sand Containers Twin Cell Beach Outlets — Adjacent to Urangan Pier

PROJECT:

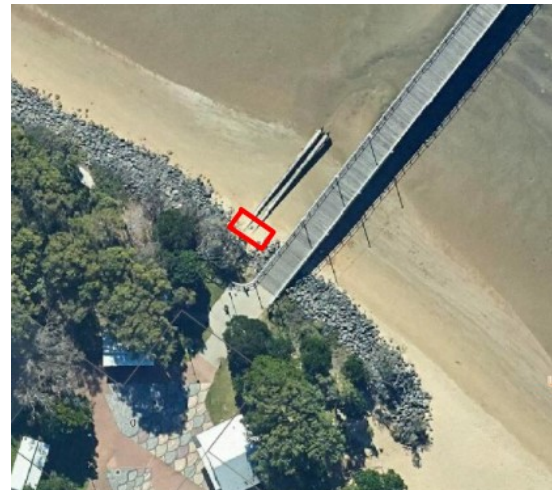

This project provides for the replacement of the existing geotextile sand containers located at the twin cell beach outlets situated adjacent to the Urangan Pier. The existing containers will be replaced with larger units. The works also including the removal and replacement of the existing rock revetment wall above the outlets to enable the works to be undertaken.

PROJECT ESTIMATE:

\$120,000

PROJECT SCOPE OF WORKS:

- Removal and disposal of existing geotextile sand containers;
- Replacement with larger geotextile sand containers;
- Removal and replacement of existing revetment wall above outlets;
- Top dressing and rehabilitation of any disturbed areas.

The traffic management plan that will be put in place for the duration of the construction period will be developed prior to works commencing. Due to the beach outlet's location, access to the site will be gained through Council's beach access point south of the project along the Esplanade. (see plan attached)
