Hi Denis

I have discussed the proposed motion with Hendrik at DTMR and he was not comfortable with the wording but has agreed with the below version.

Can you advise if you are in agreement with this revised version.

Motion

That Council write to the Minister for Transport and Main Roads requesting that north facing ramps be provided at the southern interchange for the proposed Tiaro Bypass to improve safety and effective transport to the highway for Bauple and surrounding residents.

Background

With the present layout of the Tiaro Bypass, the Bauple community will have to travel through Tiaro to gain access to Bruch Highway when travelling north and the same when returning. The Bauple community has indicated their displeasure with this arrangement and are advocating for a direct access to the bypass.

Subject: RE: Motion for the Ordinary Meeting No 7/22

Ken hi,

Given that Denis's motion (either version) runs counter to the advice of Hendrik of TMR, as conveyed to us at the recent briefing, is it possible to have the following information available for Wednesday?

1. Can we have a summary of the parts of that briefing that need to remain confidential, if any? I recall that there was some mention of confidentiality, but I can't recall what exactly that related to. Perhaps it included the budgetary position of the project, and the implications for any extensions to the project scope?

I am not fully aware of the confidential aspects of the briefing provided and the Tiaro Bypass project so not in a position to make any comments on this matter.

Given the political sensitivity, my suggestion is we should put the motion to Hendrik to see if there are any major concerns around the intent of the motion and if there are any amendments required to better align with any political issues. I understand Cr Chapman has attended a field day on Tiaro Bypass over the weekend with Hendrik and I am not sure if Cr Chapman had further discussions around the intent of the motion.

2. Is it possible to get a written summary of TMR's position on the matters raised by the motion, for tabling? (Presumably containing the substance of the advice at that briefing.)

As suggested above, probably worth seeking Hendrik's feedback on the proposed motion.

3. Can we get relevant traffic count data? I note in this context Hendrik's comments about demand, and about delays likely to be experienced in the future entering the highway from Bauple Drive. I am also interested in a count of how many traffic movements there are per day of traffic coming from Bauple and heading further north than Tiaro, and vice versa.

- DTMR counts for Tahiti Road for 2018 – 111 veh/day
- FCRC counts for Bauple Drive Nort for 2022 - 634 veh/day

Traffic count data collected by Council and other agencies are a specific location count only and there is no provision to record individual vehicles for destination counts. The counting system cannot determine how many vehicles would be travelling just to Tiaro versus those that would be travelling further north however, DMTR may have undertaken some forecast modelling to predict the percentage of traffic traveling further north of Tiaro as part of their assessment in developing the business case.

4. I note Denis, Hendrik and Davendra had a later site meeting. Is it possible for Hendrik and Davendra to advise whether, from their points of view, any new information or possible variations arose from these discussions? (I don't need any advice if it simply went over the ground covered in the briefing.)

I can advised that at the catch up meeting last week, DTMR confirmed that they are not deviating from their current layout of Tiaro Bypass and that the interchange at Tahiti Road will progress as per their layout plan published on their website. They have also confirmed that the design will make provision for a full diamond at Tahiti Road for a future on/off ramp facility. Cr Chapman and Cr Truscott has offered to discuss with Llew O'Brien and Tony Perrett to advocate to the Minister for Main Roads to go to tender to test the market on the cost for the full diamond and subject to the final tender price and available budget, DTMR may give further consideration for the diamond proposal. Hendrik seemed comfortable with this approach.

Thanks, I appreciate that this is a burden coming so late, but of course that is out of my control.

Kind regards

Hi Denis,

I have tweaked your motion as discussed.

Does this sound ok to you?:

Motion

That Council write to the Minister for Transport and Main Roads requesting that:

1. The proposed Tiaro bypass on the Bruce Highway be redesigned to provide safe access for the Bauple and surrounding residents on the northern part of Bauple Drive.
2. A full Diamond interchange on southern end of the proposed Tiaro bypass be considered to improve safety and effective transport to the highway for Bauple and surrounding residents.
3. Improved wayfinding signage be provided as part of the proposed Tiaro bypass, to assist in directing tourists and visitors to Bauple and surrounding areas.

Background

The Bauple and Surrounding residents have shown their concerns of the lack of connectivity at the Community meeting in Bauple and with TMR representatives at the public display held in Tiaro at the "Tiaro Field Day", dated 23, 24 and 25th July 2022.

This motion will enable Bauple and surrounding residents to access the highway in a northern and southernly direction without travelling through Tiaro. It will also make way finding for the northern access of Bauple much easier and safer to use for all motorist to use.

Subject: Motion for the Ordinary Meeting No 7/22

Good morning, Councillor's and Staff.

I wish to move a motion at the next Council meeting to be held at Toogoom on the 27th July 2022.

My motion reads as follows :-

That Council write to the Minister for Main Roads of Queensland, Mr Mark Bailey:

That the new Tiaro Bypass on the Bruce Highway to be redesigned to have safe access for the Bauple and Surrounding Residence on the northern part of Bauple Drive..

This access is to be designed to give Residence straight access to and from the Highway with a full Diamond Interchange System.

1. This interchange will eliminate Bauple and Surrounding Residence not being able to access the Highway without travelling through Tiaro in both a Northern and Southernly direction.
2. This interchange will also make the way finding for the Northern access of Bauple much easier and safer to use for all motorist to use.

In Summary:-

The Bauple and Surrounding Residence have shown their concerns of the lack of connectivity at the Community meeting in Bauple and with TMR representatives at the public display held in Tiaro at the “Tiaro Field Day”, dated 23,24 and 25th July 2022.

That a full Diamond interchange on southern end of the Tiaro Bypass be considered to improve safety and effective transport travel to the highway for Bauple and Surrounding Residence.

Subject: RE: Motion for the Ordinary Meeting No 7/22

Ken hi,

Given that Denis's motion (either version) runs counter to the advice of Hendrik of TMR, as conveyed to us at the recent briefing, is it possible to have the following information available for Wednesday?

1. Can we have a summary of the parts of that briefing that need to remain confidential, if any? I recall that there was some mention of confidentiality, but I can't recall what exactly that related to. Perhaps it included the budgetary position of the project, and the implications for any extensions to the project scope?

I am not fully aware of the confidential aspects of the briefing provided and the Tiaro Bypass project so not in a position to make any comments on this matter.

Given the political sensitivity, my suggestion is we should put the motion to Hendrik to see if there are any major concerns around the intent of the motion and if there are any amendments required to better align with any political issues. I understand Cr Chapman has attended a field day on Tiaro Bypass over the weekend with Hendrik and I am not sure if Cr Chapman had further discussions around the intent of the motion.

2. Is it possible to get a written summary of TMR's position on the matters raised by the motion, for tabling? (Presumably containing the substance of the advice at that briefing.)

As suggested above, probably worth seeking Hendrik's feedback on the proposed motion.

3. Can we get relevant traffic count data? I note in this context Hendrik's comments about demand, and about delays likely to be experienced in the future entering the highway from Bauple Drive. I am also interested in a count of how many traffic movements there are per day of traffic coming from Bauple and heading further north than Tiaro, and vice versa.

- DTMR counts for Tahiti Road for 2018 – 111 veh/day
- FCRC counts for Bauple Drive Nort for 2022 - 634 veh/day

Traffic count data collected by Council and other agencies are a specific location count only and there is no provision to record individual vehicles for destination counts. The counting system cannot determine how many vehicles would be travelling just to Tiaro versus those that would be travelling further north however,

DMTR may have undertaken some forecast modelling to predict the percentage of traffic traveling further north of Tiaro as part of their assessment in developing the business case.

4. I note Denis, Hendrik and Davendra had a later site meeting. Is it possible for Hendrik and Davendra to advise whether, from their points of view, any new information or possible variations arose from these discussions? (I don't need any advice if it simply went over the ground covered in the briefing.)

I can advised that at the catch up meeting last week, DTMR confirmed that they are not deviating from their current layout of Tiaro Bypass and that the interchange at Tahiti Road will progress as per their layout plan published on their website. They have also confirmed that the design will make provision for a full diamond at Tahiti Road for a future on/off ramp facility. Cr Chapman and Cr Truscott has offered to discuss with Llew O'Brien and Tony Perrett to advocate to the Minister for Main Roads to go to tender to test the market on the cost for the full diamond and subject to the final tender price and available budget, DTMR may give further consideration for the diamond proposal. Hendrik seemed comfortable with this approach.

Thanks, I appreciate that this is a burden coming so late, but of course that is out of my control.

Hi Denis

I have discussed the proposed motion with Hendrik at DTMR and he was not comfortable with the wording but has agreed with the below version.

Can you advise if you are in agreement with this revised version.

Motion

That Council write to the Minister for Transport and Main Roads requesting that north facing ramps be provided at the southern interchange for the proposed Tiaro Bypass to improve safety and effective transport to the highway for Bauple and surrounding residents.

Background

With the present layout of the Tiaro Bypass, the Bauple community will have to travel through Tiaro to gain access to Bruch Highway when travelling north and the same when returning. The Bauple community has indicated their displeasure with this arrangement and are advocating for a direct access to the bypass.

Subject: RE: Motion for the Ordinary Meeting No 7/22

Ken hi,

Given that Denis's motion (either version) runs counter to the advice of Hendrik of TMR, as conveyed to us at the recent briefing, is it possible to have the following information available for Wednesday?

1. Can we have a summary of the parts of that briefing that need to remain confidential, if any? I recall that there was some mention of confidentiality, but I can't recall what exactly that related to. Perhaps it included the budgetary position of the project, and the implications for any extensions to the project scope?

I am not fully aware of the confidential aspects of the briefing provided and the Tiaro Bypass project so not in a position to make any comments on this matter.

Given the political sensitivity, my suggestion is we should put the motion to Hendrik to see if there are any major concerns around the intent of the motion and if there are any amendments required to better align with any political issues. I understand Cr Chapman has attended a field day on Tiaro Bypass over the weekend with Hendrik and I am not sure if Cr Chapman had further discussions around the intent of the motion.

2. Is it possible to get a written summary of TMR's position on the matters raised by the motion, for tabling? (Presumably containing the substance of the advice at that briefing.)

As suggested above, probably worth seeking Hendrik's feedback on the proposed motion.

3. Can we get relevant traffic count data? I note in this context Hendrik's comments about demand, and about delays likely to be experienced in the future entering the highway from Bauple Drive. I am also interested in a count of how many traffic movements there are per day of traffic coming from Bauple and heading further north than Tiaro, and vice versa.

- [DTMR counts for Tahiti Road for 2018 – 111 veh/day](#)

- FCRC counts for Bauple Drive Nort for 2022 - 634 veh/day

Traffic count data collected by Council and other agencies are a specific location count only and there is no provision to record individual vehicles for destination counts. The counting system cannot determine how many vehicles would be travelling just to Tiaro versus those that would be travelling further north however, DMTR may have undertaken some forecast modelling to predict the percentage of traffic traveling further north of Tiaro as part of their assessment in developing the business case.

4. I note Denis, Hendrik and Davendra had a later site meeting. Is it possible for Hendrik and Davendra to advise whether, from their points of view, any new information or possible variations arose from these discussions? (I don't need any advice if it simply went over the ground covered in the briefing.)

I can advised that at the catch up meeting last week, DTMR confirmed that they are not deviating from their current layout of Tiaro Bypass and that the interchange at Tahiti Road will progress as per their layout plan published on their website. They have also confirmed that the design will make provision for a full diamond at Tahiti Road for a future on/off ramp facility. Cr Chapman and Cr Truscott has offered to discuss with Llew O'Brien and Tony Perrett to advocate to the Minister for Main Roads to go to tender to test the market on the cost for the full diamond and subject to the final tender price and available budget, DTMR may give further consideration for the diamond proposal. Hendrik seemed comfortable with this approach.

Thanks, I appreciate that this is a burden coming so late, but of course that is out of my control.

Kind regards

Hi Denis,

I have tweaked your motion as discussed.

Does this sound ok to you?:

Motion

That Council write to the Minister for Transport and Main Roads requesting that:

1. The proposed Tiaro bypass on the Bruce Highway be redesigned to provide safe access for the Bauple and surrounding residents on the northern part of Bauple Drive.
2. A full Diamond interchange on southern end of the proposed Tiaro bypass be considered to improve safety and effective transport to the highway for Bauple and surrounding residents.
3. Improved wayfinding signage be provided as part of the proposed Tiaro bypass, to assist in directing tourists and visitors to Bauple and surrounding areas.

Background

The Bauple and Surrounding residents have shown their concerns of the lack of connectivity at the Community meeting in Bauple and with TMR representatives at the public display held in Tiaro at the "Tiaro Field Day", dated 23, 24 and 25th July 2022.

This motion will enable Bauple and surrounding residents to access the highway in a northern and southernly direction without travelling through Tiaro. It will also make way finding for the northern access of Bauple much easier and safer to use for all motorist to use.

Subject: Motion for the Ordinary Meeting No 7/22

Good morning, Councillor's and Staff.

I wish to move a motion at the next Council meeting to be held at Toogoom on the 27th July 2022.

My motion reads as follows :-

That Council write to the Minister for Main Roads of Queensland, Mr Mark Bailey:

That the new Tiaro Bypass on the Bruce Highway to be redesigned to have safe access for the Bauple and Surrounding Residence on the northern part of Bauple Drive..

This access is to be designed to give Residence straight access to and from the Highway with a full Diamond Interchange System.

1. This interchange will eliminate Bauple and Surrounding Residence not being able to access the Highway without travelling through Tiaro in both a Northern and Southernly direction.
2. This interchange will also make the way finding for the Northern access of Bauple much easier and safer to use for all motorist to use.

In Summary:-

The Bauple and Surrounding Residence have shown their concerns of the lack of connectivity at the Community meeting in Bauple and with TMR representatives at the public display held in Tiaro at the "Tiaro Field Day", dated 23,24 and 25th July 2022.

That a full Diamond interchange on southern end of the Tiaro Bypass be considered to improve safety and effective transport travel to the highway for Bauple and Surrounding Residence.

Subject: RE: Motion for the Ordinary Meeting No 7/22

Ken hi,

Given that Denis's motion (either version) runs counter to the advice of Hendrik of TMR, as conveyed to us at the recent briefing, is it possible to have the following information available for Wednesday?

1. Can we have a summary of the parts of that briefing that need to remain confidential, if any? I recall that there was some mention of confidentiality, but I can't recall what exactly that related to. Perhaps it included the budgetary position of the project, and the implications for any extensions to the project scope?

I am not fully aware of the confidential aspects of the briefing provided and the Tiaro Bypass project so not in a position to make any comments on this matter.

Given the political sensitivity, my suggestion is we should put the motion to Hendrik to see if there are any major concerns around the intent of the motion and if there are any amendments required to better align with any political issues. I understand Cr Chapman has attended a field day on Tiaro Bypass over the weekend with Hendrik and I am not sure if Cr Chapman had further discussions around the intent of the motion.

2. Is it possible to get a written summary of TMR's position on the matters raised by the motion, for tabling? (Presumably containing the substance of the advice at that briefing.)

As suggested above, probably worth seeking Hendrik's feedback on the proposed motion.

3. Can we get relevant traffic count data? I note in this context Hendrik's comments about demand, and about delays likely to be experienced in the future entering the highway from Bauple Drive. I am also interested in a count of how many traffic movements there are per day of traffic coming from Bauple and heading further north than Tiaro, and vice versa.

- DTMR counts for Tahiti Road for 2018 – 111 veh/day
- FCRC counts for Bauple Drive Nort for 2022 - 634 veh/day

Traffic count data collected by Council and other agencies are a specific location count only and there is no provision to record individual vehicles for destination counts. The counting system cannot determine how many vehicles would be travelling just to Tiaro versus those that would be travelling further north however, DMTR may have undertaken some forecast modelling to predict the percentage of traffic traveling further north of Tiaro as part of their assessment in developing the business case.

4. I note Denis, Hendrik and Davendra had a later site meeting. Is it possible for Hendrik and Davendra to advise whether, from their points of view, any new information or possible variations arose from these discussions? (I don't need any advice if it simply went over the ground covered in the briefing.)

I can advised that at the catch up meeting last week, DTMR confirmed that they are not deviating from their current layout of Tiaro Bypass and that the interchange at Tahiti Road will progress as per their layout plan published on their website. They have also confirmed that the design will make provision for a full diamond at Tahiti Road for a future on/off ramp facility. Cr Chapman and Cr Truscott has offered to discuss with Llew O'Brien and Tony Perrett to advocate to the Minister for Main Roads to go to tender to test the market on the cost for the full diamond and subject to the final tender price and available budget, DTMR may give further consideration for the diamond proposal. Hendrik seemed comfortable with this approach.

Thanks, I appreciate that this is a burden coming so late, but of course that is out of my control.

I have commented below in red.

I do not think the motion in its present form will be helpful.

It give the impression there is no appreciation that the project team (TMR) extended the scope to incorporate Bauple Dr into the project and subsequently addresses a future significant safety issue for right turning traffic into Bruce Highway.

The project budget is presently insufficient and this may put the extension of scope at risk. The motion as is is therefore in my opinion not helpful for the Bauple community's own safety as the traffic volume increase on Bruce Highway will make the said movement more risky since delays will increase over time to enter the Highway.

If your Council want us to provide you with info at your meeting and explain what I have tried to convey above, I will gladly comply.

I respectfully suggest the motion, if supported by your council, should be limited to point 2

Thanks

Hendrik Roux

Subject: Tiaro Bypass - Proposed Council Motion

Hi Hendrik,

The below is a draft of the motion that is going to be tabled at Council meeting tomorrow.

I just wanted to pass this to you for any comments and if there are any political sensitivity around what we are proposing.

The motion will be put forward by Cr Chapman and I understand you have already discuss the intent of this motion with Cr Chapman.

This is not correct... he just mention he will do a motion.. the content was not discussed with me. I personally think the motion in its present form

Any feedback would be appreciated.

Motion

That Council write to the Minister for Transport and Main Roads requesting that:

1. The proposed Tiaro bypass on the Bruce Highway be redesigned to provide safe access for the Bauple and surrounding residents on the northern part of Bauple Drive.

The statement suggest the access provided is unsafe but no direct mention is made why this perception exist.. you need to be clear in where is the existing proposal's access for Bauple are unsafe. I definitely dispute this statement

2. A full Diamond interchange on southern end of the proposed Tiaro bypass be considered to improve safety and effective transport to the highway for Bauple and surrounding residents.

Yes that was the conclusion that Cr Denis Chapman also reached.. this proposal will solve the Bauple communities concern.

3. Improved wayfinding signage be provided as part of the proposed Tiaro bypass, to assist in directing tourists and visitors to Bauple and surrounding areas.

I have clearly indicated at the community meeting and at the meeting between us 3 in Tiaro that that is the intent... why do you need a motion to ask for something we already said we plan to do.

Signage is part of the next phase and it will be included and shown on plans and then consulted.

Background

(This is someone's opinion and I will not comment on it)

The Bauple and Surrounding residents have shown their concerns of the lack of connectivity at the Community meeting in Bauple and with TMR representatives at the public display held in Tiaro at the "Tiaro Field Day", dated 23, 24 and 25th July 2022.

This motion will enable Bauple and surrounding residents to access the highway in a northern and southernly direction without travelling through Tiaro. It will also make way finding for the northern access of Bauple much easier and safer to use for all motorist to use.
