

Bitumen Reseals – Urangan, Booral, Urraween, Craignish, Takura, Torbanlea, Howard, Pacific Haven, Maryborough, Tinana, Granville, Oakhurst, Dunmora, Yerra, Gootchie, Glenwood and Poon

PROJECT:

This project provides for the bitumen resealing of a number of streets in Urangan, Booral, Urraween, Craignish, Takura, Torbanlea, Howard, Pacific Haven, Maryborough, Tinana, Granville, Oakhurst, Dunmora, Yerra, Gootchie, Glenwood and Poon. (A full list of the locations is attached).

A bitumen reseal involves spraying a thin layer of bitumen over an existing old road surface. The bitumen seal protects the underlying road pavement materials from weather damage. A stone aggregate is then spread on top and rolled in to provide the necessary skid resistant surface texture. Bitumen seals are used to seal newly constructed work (gravel) and extend the life of an existing road by 8-14 years depending on traffic loading.

PROJECT ESTIMATE:

\$1.65M

The Contractors program will provide detail of traffic management for the duration of the construction period and/or detail relating to traffic management arrangements including detours available; however, a normal resurfacing treatment will only impact residents for a short period of time.
