

Replacement of Timber Retaining Wall and Associated Works – Mungar Terrace, Mungar

PROJECT:

This project provides for the replacement of the existing timber retaining wall located adjacent to the Mungar State School in Mungar Terrace, Mungar. The timber retaining wall will be replaced with a new retaining wall constructed of concrete sleepers. The construction of new concrete stairs, kerb and channelling and footpath works will also be completed as part of this project.

This project is being completed to improve the safety of the existing student drop off/pick up area located in Mungar Terrace.

PROJECT ESTIMATE:

\$290,000 (this project is partly funded through the State Government’s Transport Infrastructure Development Scheme)

The traffic and pedestrian management plan that will be put in place for the duration of the construction period will be developed prior to works commencing.

PROJECT SCOPE OF WORKS:

The project scope is as follows:

- Removal and disposal of existing timber retaining wall;
- Construction of new concrete sleeper retaining wall;
- Removal and reconstruction of existing stairs x 2;
- Removal and replacement of barrier fencing on top of new retaining wall;
- Construction of new areas of kerb and channel and footpaths;
- Pavement marking and signage;
- Reinstatement works.
